MEMORANDUM FOR Colorado Wing Orientation Pilots

FROM: COWG/DO

SUBJECT: COWG Orientation Flight Labeling

1. Colorado Wing Operations is now looking at improving the tracking of Cadet Orientations Flights specifically to which Squadrons are flown. This classification and calculation will be easily accomplished via the reports available in WIMRS with a standardized approach to reporting information on Orientation Flights.
2. Orientation Pilots will label all A15 (Orientation) flights by utilizing the ‘Tracking No.’ field in each sortie to identify the Squadron of the cadet flying in the front seat.

3. Orientation Flight Tracking Guidelines

a. Labeling Field: Tracking No.

b. Labeling Information

- Label the Cadet Orientation Flight sortie using the Squadron acronym based on the table below.
- Relocation Flight – add the prefix “Relo-“ to the Squadron acronym (e.g. Relo-PCS).
